

# LIPO LAX VL

FAT DISSOLVING SOLUTION FOR THE FACE

Innovative fat-burning therapy for the face

An innovative premium product made by Koru Pharmaceuticals - **LipoLax VL** - will never make your patients feel indifferent! Its lipolysis-based formula for the face is effective at eliminating local fat deposits in various face areas. It's the best product choice for patients to achieve an ideal face shape.

**LipoLax VL** removes local fat deposits, and also strengthens the dermal framework, tightens the skin, eliminates age-related ptosis and enhances the facial contours.

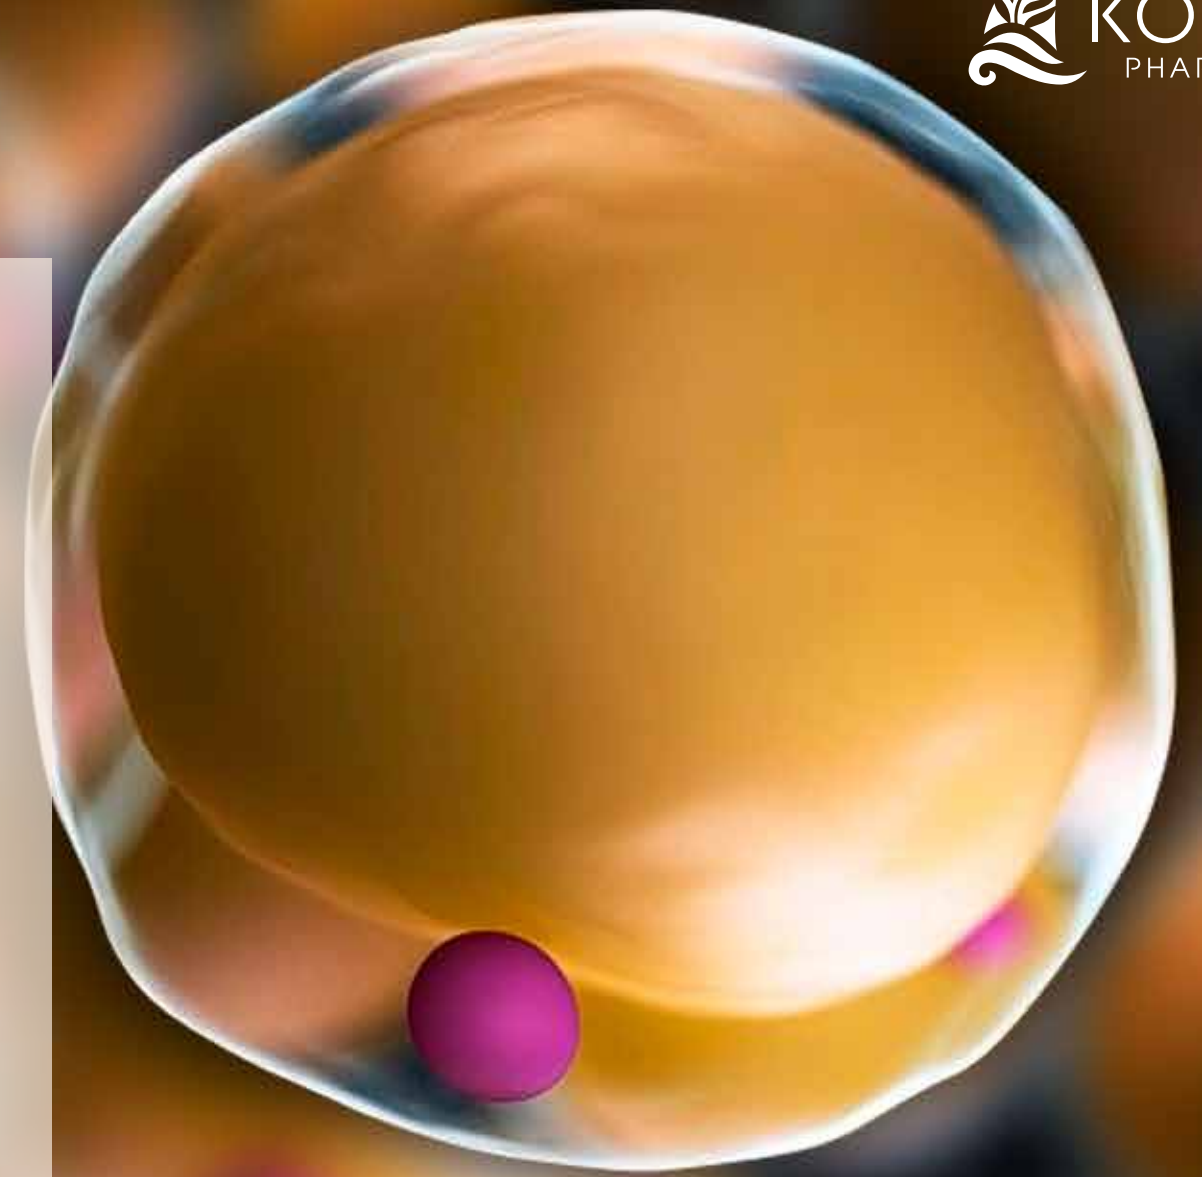

**How does it work?**

By eliminating a surplus of subcutaneous fat, skin rejuvenation and lifting can take place simultaneously which will prevent sagging and the appearance of folds and wrinkles.

The effects of **LipoLax VL** are driven by lipolysis, a process that results in the cleavage of one molecule of triglycerol (the substance that makes up an adipocyte, or fat cell) into three molecules of fatty acid and one molecule of glycerol.

There is a unique combination of ingredients which will never disappoint your patients with its effectiveness and perfect results after 1-3 treatments.

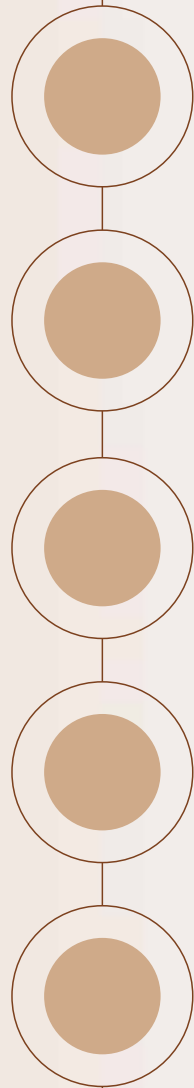

- Phosphatidylcholine
- Acetyl hexapeptide-8 (botox peptide)
- Palmitoyl pentapeptide-4 and Plamitoyl pentapeptide-7
- L-Carnosine

# 02

## Effects

Removes local fat deposits and improves the facial contours

Activates dermal fibroblasts functions and enhancements collagen

Improves skin tone and elasticity while smoothing, clarifying, hydrating and softening the skin

Lifts and smoothes the skin, reduces the depth of wrinkles and folds

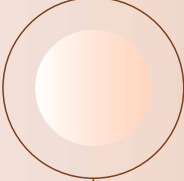

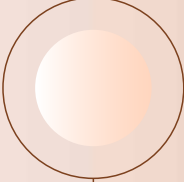

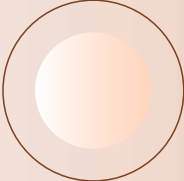

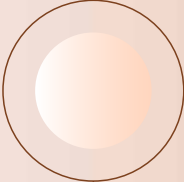

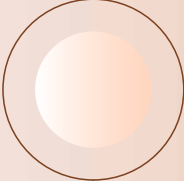

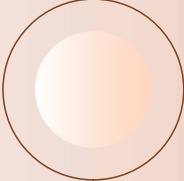

Stimulates cellular renewal and skin rejuvenation

# 03

LIPOLYTIC MESOTHERAPY

## Benefits & Areas of Correction

Ears

Nose

Cheeks

Nasolabial folds

Mandibular angle

Chin

Neck

# 04

LIPOLYTIC MESOTHERAPY  
Application Procedure

Preliminary treatment of the skin with alcohol lotion or chlorhexidine

Introduction of the product into the area of the body where it is necessary to activate lipolysis

Final treatment of the skin with antiseptic

TYPE OF NEEDLE	30G, 32G, 33G
DOSAGE AND ADMINISTRATION	<ul style="list-style-type: none"> <li>• A single treatment might consist of 0.3 ml injections (up to a total of 10 ml) spaced 1 cm apart</li> <li>• Depth of injection : 0.2-0.6 cm</li> <li>• The treatments should be administered with interval of 14 days between each treatment</li> </ul>
COURSE OF PROCEDURES	2-5 sessions

# 05

- Use a cleanser to remove makeup if necessary, and prepare the injection areas
- Apply an antiseptic solution to the area to be treated
- This procedure can be done under local anesthesia if necessary (apply a cooling pain-free gel to minimize pain)
- Slowly and carefully inject the product into the subcutaneous fat layer of soft tissue where the excessive fat is to be removed
- After injection, the patient is recommended to lie down for 30 minutes to ensure that the product spreads out evenly. During this waiting period, the physician should monitor the patient's condition
- The patient is recommended to drink mineral water, which will accelerate the removal of waste products

### Contraindications

- Individual intolerance of main drug components
- Liver or kidney diseases
- Endocrine system diseases
- Cancer
- Epilepsy

- Exacerbation of chronic illness (ulcer, arthritis, bronchitis, herpes)

- Loss of facial contour

## Caution, Storage & Package

### Caution

- This product should only be used for the intended purpose
- Do not use if the package is damaged
- Avoid contact with eyes. Keep out of reach of children
- Do not use on damaged or irritated skin
- Stop using immediately if the patient experiences any redness, irritation, sensitivity or allergic reaction of any kind

### Storage

- Do not use if the package is damaged
- Leftover product must be sealed and refrigerated at 1 ~ 5 °C

### Package

10 vials / 10 ml

## Ingredients

### PHOSPHATIDYLCHOLINE

CAS NO. : 8002-43-5

WEIGHT : <0.60%

### 1,2-HEXANEDIOL

CAS NO. : 6920-22-5

WEIGHT : <2.00%

### ACETYL HEXAPEPTIDE-8

CAS NO. : 616204-22-9

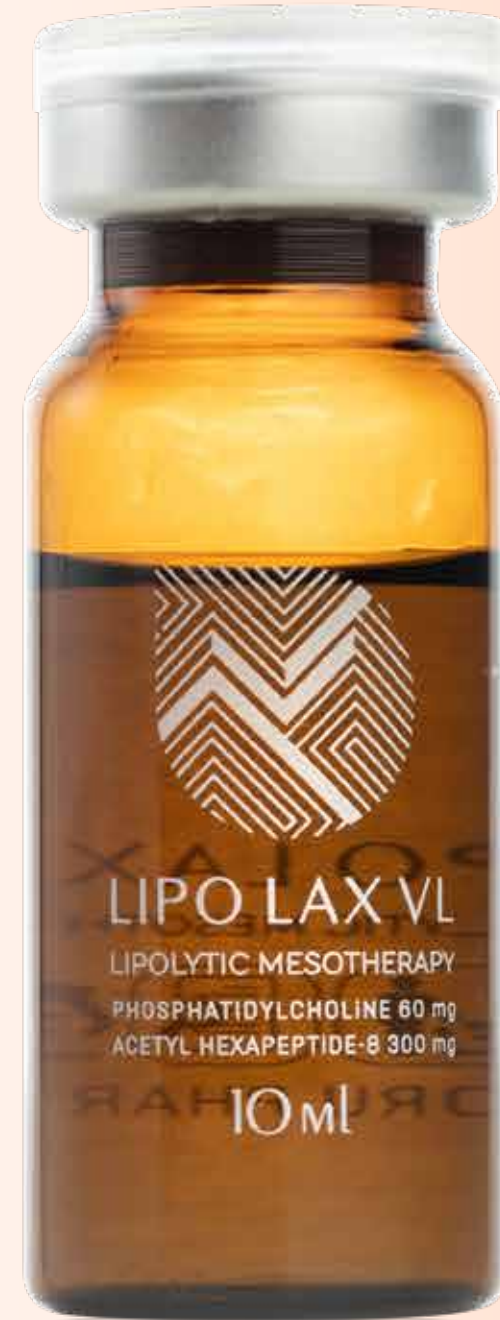

WEIGHT : <3.00%

### WATER

CAS NO. : 7732-18-5

WEIGHT : <88.00%

## INGREDIENTS

## INGREDIENTS

### PALMITOYL TETRAPEPTIDE-4

CAS NO. : 214047-00-4

WEIGHT : <1.70%

### PALMITOYL TETRAPEPTIDE-7

CAS NO. : 221227-05-0

WEIGHT : <1.70%

### SODIUM HYALURONATE

CAS NO. : 9067-32-7

WEIGHT : <2.00%

### L-CARNOSINE

CAS NO. : 56353-15-2

WEIGHT : <1.00%
